Capacity: 300 Bph
Mains Power req: 240v, single phase, 50Hz
Compressed air req: None
Weight: 25 Kg
Dimensions: 650 x 460 x 450h mm

Through vacuum operated filling, the product is bottled in a most natural way, allowing to maintain its original quality and features. When placing the bottle under the machine, the fluid is sucked by the vacuum created inside the bottle, without any contact between product and pumps or mechanical components.

The ACOV4 fills about 300 bottles per hour, in perfect hygienic conditions and with no product spillage. The filling level is adjustable: once selected, it automatically fills up the bottle to the desired level. Simple to use and clean: a great advantage especially when bottling oils. No need for header tanks, will suck product from floor level.

- All stainless steel
- Semi-automatic
- Fully adjustable fill heights
- Easy strip down for cleaning
- Bottle platforms
