Belt Conveyor

Belt Driven Conveyors the cost effective solution for transporting unit loads.

Our range of powered belt conveyors are designed for applications where improved load control and speed of operation are important factors. They are particularly useful when a conveyor is required to carry fragile loads or a wide range of load weights or sizes.

Level Belt

Level belt conveyors are for the horizontal transportation of items and assembly line operations. They are available in lengths from 2m up to 30m in 0.5 increments. They are constructed using cold formed steel and powder coated channels with two bed type options - Monobed and Roller bed.

- Centre Driven belt speeds 9, 14, 18, 24 and 30m per minute.
- End Driven by a motorised drum, belt Speeds - 15.6, 18.6 and 21.6m per minute - up to 10m long.
- Robust and durable 2-ply transmission belt.
- Level belt conveyors can be used with the majority of package conveyor accessories
- Low noise operation

Inclined Belt

Inclined belt conveyors are used to deliver packages or boxes from one floor to another and when fitted with a reversing control can operate in either direction. They can be used as stand alone units or as integrated elements of a conveyor system.

- Centre Driven belt speeds 9, 14, 18, 24 and 30m per minute.
- Robust and durable 2-ply feeder transmission belt and gripface incline belt.
- Incline belt conveyors can be used with the majority of package conveyor accessories
- Low noise operation
- Powered feeder for positive transfer from horizontal to incline.
- Top curve for smooth transfer from incline to horizontal.
